MACKENZIE RIVER AND GREAT SLAVE LAKE

It will be the responsibility of the Consignee to provide proper marine transfer facilities at loading point and adequate storage facilities at place of discharge. The Consignee shall also provide adequate and proper pipeline facilities from storage tanks to accessible shoreline at normal highwater mark for discharge hose connection from the barge. Pipeline facilities shall be kept in good order and system shall be ready to accept cargo immediately upon connection.

On the Mackenzie River and Great Slave Lake, rates shall apply only on shipments consisting of a single product from one point or origin to one delivery at one destination amounting to 115,000 litres or over. Single product volumes below 115,000 litres will be rated at the base tariff for the respective destination as stipulated in NTCL Tariff No. 1003 and any of its subsequent versions.

Rates are divided into two rate groupings, Distillates and Low Flash.

Distillates group includes, but is not limited to, diesel fuels (all kinds) and Jet A fuels (all kinds). Low Flash group includes, but is not limited to, motor gasolines(all kinds), turbo fuels (all kinds) and aviation gasolines (all kinds).

Rates are expressed in Canadian cents per litre.

Refer to Western Arctic Tariff NTCL No. 1001 and any of its subsequent versions, Rules and Regulations, Item 14, Bulk Petroleum Allowance.
